

Transferring files to and from Syd using linux

- 1.) From the task bar (at the top of the screen), select places -> connect to server
- 2.) For the service type, select “SSH” from the drop down menu.
- 3.) Complete the remaining fields as shown

- 4.) Click “Connect”.
- 5.) Enter the password for Syd as per usual and click “Connect”
- 6.) This will bring up a window where you can browse files that are on Syd.
- 7.) To transfer files, copy and paste from your computer to your folder on Syd.
