10. What do you like about this module?

Your comments:

The course has a clean, well advertised structure; topics are divided nicely in a way that studying it is definitely ~~too~~ manageable. Lecturers are approachable and care about any issue that might rise. The notes uploaded on blackboard work out nicely as well.

Your comments:

~~The information~~

The course material is very interesting especially the movie quizzes.

It is very rewarding when you figure out a problem on this course, it is also enjoyable working through said problems.

Lectures are actually fun to attend, you clearly enjoy what you do and it

Makes it easier to learn from you

10. What do you like about this module?

Your comments:

- Michel is very nice and enthusiastic about the subject which makes it more enjoyable
- The tutorials are extremely helpful and are on at good times.
- The movie quizzes are nice to break up the lectures.

11. What suggestions can you offer that would help make this module a more valuable learning experience for you?

Your comments:

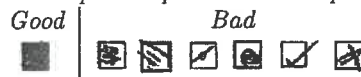

- more examples in the lectures on actual questions rather than just deriving formulae.
- more explaining on circular motion
- use symbols that were used last semester as all the new symbols such as dots for derivatives are confusing.

11. What suggestions can you offer that would help make this module a more valuable learning experience for you?

Your comments:

I think that it would be more effective to have homework assignments instead of having a multiple choice question exam every few weeks in the lectures, this way there would be more of an incentive to consistently learn and practice the material (thought to come in the lectures).

(more so first semester) It may help to have lectures a little more focused on examples and exam style questions.

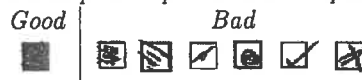

I also find it a bit intimidating going through general solutions with lots of annotation ~~to~~ instead of looking at an example with actual figures.

10. What do you like about this module?

Your comments:

Find material interesting and I am good at it

11. What suggestions can you offer that would help make this module a more valuable learning experience for you?

Your comments:

The tutorials are a lot better at actually preparing you for an exam than the lecture and I wasn't aware of how useful they were until the 2nd semester.

Homework is a better alternative to MCQs for assessment

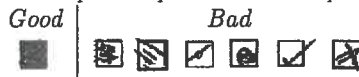

Need past exam papers for MCQs

Your comments:

I like the problems, the lecturers sense of humour and the tutorials are excellent - Richie should get a pay rise!

11. What suggestions can you offer that would help make this module a more valuable learning experience for you?

Your comments:

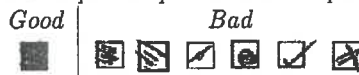

I find going through proofs unhelpful, I wish we could do more problems - another reason why tutorials are essential. I find it sometimes discouraging that we are told so often how many ppl fail the course - feels like unnecessary pressure. The in class tests are good preparation for the exams.

Michel is a great lecturer. He makes great effort to explain the maths and makes great movie maths quizzes.

Richie is invaluable. I would not know how to answer questions without the tutorials.

11. What suggestions can you offer that would help make this module a more valuable learning experience for you?

Your comments:

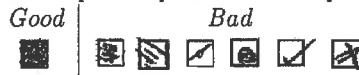

Better access to example questions with solutions.
