Your comments:

I like Michel and he's very engaging

11. What suggestions can you offer that would help make this module a more valuable learning experience for you?

Your comments:

The tutorials are not as helpful as last year by a long way. The lectures do not help me to understand the exam questions at all/rarely. Its frustrating at times when I don't feel there is enough focus on examples. Also, not covering in class tests in tutorials or having enough examples properly before the test is unfair & causes unnecessary stress.

~~The tutorials~~

The tutor's writing is too large on the board, so he spends a lot of time on writing. Maybe he can use projection.

Perhaps the tutor should skip those problems we have learnt ~~in~~ <sup>in the</sup> lecture (for example, 'State Fermat's principle').

If he doesn't know what ~~is~~ <sup>is</sup> in our lecture notes, maybe he can read it before giving us tutorial.

Your comments:

The objective of what Michel does in lectures is rarely clear until he is finished, which makes it harder to follow.

It would be helpful to know the goal before explaining the method to reach the goal.

10. What do you like about this module?

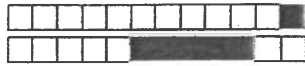

Your comments:

I like how he puts up lots of material on Blackboard, including other lecturers' notes. It is very helpful.

Michel is also a delight.

11. What suggestions can you offer that would help make this module a more valuable learning experience for you?

Your comments:

I think Michel could make it more clear on the applications of the course material. There could be more practical everyday problems to be solved with actual figures and solutions rather than just variables (instead of in terms of symbols etc.).

10. What do you like about this module?

Your comments:

The lecturer and the tutorials.  
Lecturer very engaging and funny  
and tutorials are very helpful with  
problem sheets and questions. Material  
can be very abstract at times and  
lecture material doesn't apply to  
problems ~~can be improved~~ on all the  
time which can be challenging.

11. What suggestions can you offer that would help make this module a more valuable learning experience for you?

Your comments:

The maths

11. What suggestions can you offer that would help make this module a more valuable learning experience for you?

Your comments:

- Slow down with the maths
- Explain the steps more please
- Don't do integration by substitution in one step in your head and not tell us
- Examples with numbers perhaps?
- Explain all the variables in context
- Do we need to learn off the proofs or just the formulae? No-one knows.
- Please put tutorial Mike's email on the Blackboard
